Professional Summary

Customer success operations practitioner specializing in Gainsight Journey Orchestrator, digital-led CS motions, CSM-facing reporting, and the AI and knowledge systems a 50+ CSM organization runs on. Two consecutive terms on the Gainsight CS Ops Product Council, Pulse Academy Live presenter, two-time Platinum Gainstar. Came up through lifecycle email operations and enterprise change communications, which is where the audience segmentation and behavioral design underneath the CS motions comes from.

Core Skills

Gainsight: NXT Level 2 certified. Journey Orchestrator (Dynamic and Advanced JOs, audience filters, participant logic), Data Designer and data management (templates, merges, transforms, unions, queries), Health Scores (Domo-fed inputs, talking-point generation, script logic maintenance), CTAs and Playbooks, Gainsight Copilot, Cockpit, Dynamic Customer Lists, Surveys, Reports and Dashboards

AI Enablement: Gemini (custom Gems, Deep Research), Gemini Notebook (formerly NotebookLM), Claude (Projects, reusable Skills), Microsoft Copilot Premium (grounding, memory), Granola — prompt design, agent and skill architecture, design-time vs. runtime thinking

Digital CS: Digital-led and scaled CX journeys, B2H (“business-to-human”) communication design, lifecycle and audience segmentation, change management, CSM enablement

Knowledge and Governance: Knowledge systems (SharePoint, Microsoft Loop, Notion) — database and schema design, wikis, forms, dashboards, infographics, SOPs; documentation and naming conventions; software evaluation through legal and security review; project planning

Platforms and Tools: Gainsight, Salesforce, Domo, Notion, Google Workspace, Microsoft 365, Slack, Jira, Atlassian Rovo, Confluence, Smartsheet, Airtable, Adobe (Photoshop, Illustrator), HTML

Professional Experience

Staff Customer Success Communications and Content Manager

Henry Schein One · Remote · January 2026 – Present

- Own the CS intelligence and AI-enablement function for a 50+ CSM organization: Journey Orchestrator architecture, the AI workflows the team runs on, and the knowledge systems underneath both. Partner with Salesforce administration and BI on the upstream data layer.
- Built 7 of the 16 Journey Orchestrator programs running in production, mostly lifecycle, and own triage when one stops firing.
- Retired an EBR-prep prompt I'd shipped to the Gainsight Copilot library — the output was inconsistent. Orchestrated the replacement with our BI and data teams: a self-service Domo dashboard where a CSM enters an account number and gets usage data beside talking points from a script I own. Prep dropped from an hour-plus to 15–30 minutes.
- Built the JO behind a pooled, self-service coverage model for weekly P2/P3 compliance — several hundred accounts served without CSM-per-account assignment, resolving status themselves or triggering a CTA for hands-on help. Under 10% escalate to a human, letting the team raise send volume and close terminalization faster without adding headcount.
- Designed the weekly CS Ops reporting workflow, replacing a manual status email. Microsoft Copilot prompts normalize the team's Jira and Loop entries into a fixed schema — wins, blockers, on-track status, email and CTA metrics, roadmap — then render an HTML infographic. Prep dropped from half a day to 15–20 minutes, and it feeds director-level reporting.
- Pitched Notion as the CS Ops knowledge substrate and lost. Reworked the plan around an internal SharePoint site — lists, Copilot agents, and the related assets the team already works in — built on licenses the org already holds. No net-new vendor, no additional security review, no per-seat AI spend.
- Traced the CS org's Teams channel sprawl to its cause: meetings scheduled through Outlook spawn a channel apiece, scattering discussion across hundreds of them. Converting recurring meetings to in-channel scheduling, consolidating onto shared channels, and routing ad-hoc request intake through Jira.

Senior Email Operations Specialist

Recorded Future · Remote · January 2022 – January 2026

- Promoted from Email Campaign Specialist to Senior Email Operations Specialist in November 2024.
- Migrated legacy batch-and-blast email into behavior-triggered Journey Orchestrator programs running on real-time data. New-user activation reached a 47% click-to-open rate against a ~20% industry baseline; regional segmentation hit 67% CTOR, roughly 3x the global average.
- Re-architected webinar link and registration flows, driving a 300% increase in registration rates.
- Built platform-agnostic asset architecture — modular reusable templates, S3 storage, decoupled data pipelines — so campaigns survived tooling changes.
- Created Gemini agentic workflows (“Gems”) for task orchestration, brand-aligned copywriting, and technical link extraction, before AI tooling was part of the team's remit.
- Shepherded software through a cybersecurity company's legal and security review. When a vendor's documentation came up short, worked with their product team until their public FAQ carried the detail our security reviewers needed.

Email Marketing Specialist

Rugs.com (Unique USA Inc) · Charlotte, NC / Remote · 2021

- Produced 14+ campaigns weekly across audiences up to 1.9M, managing variants for a 1.1M+ subscriber list, and executed IP-warming through CRM migrations.

Change Communications Specialist (Business Initiatives Consultant II)

Wells Fargo · Charlotte, NC / Remote · 2019 – 2020

- Drove enterprise change communications across large-scale business initiatives.

Email Marketing Specialist

Quest Oracle Community · 2017 – 2019

- Built 20–30 technical and CPE email programs monthly for a 65K+ member community reaching C-level and end-user audiences.

Communications and IT / Media Manager

Silver Springs Stud / Margaux Farm · 2009 – 2017

- Led marketing, communications, and early digital and media operations for Kentucky Thoroughbred businesses.

Community and Thought Leadership

- **Gainsight CS Ops Product Council (2025 and 2026 terms)** — selected two consecutive years to advise Gainsight on product development alongside admins from enterprise SaaS organizations.
- **Two-time Platinum Gainstar** — second-highest point total community-wide in 2026, and one of six members at Platinum tier (US-based). Recognized on stage at Gainsight Pulse (2026, Las Vegas).
- **Gainsight Pulse Academy Live presenter (2025, Las Vegas)** — on combining Data Designer templates and broad audiences with Dynamic JO audience filters for standardization and precision targeting at scale.
- **Gainsight Gamechanger Community** — VIP contributor; author of a published Journey Orchestrator best-practices article series.
- **AI in Post-Sale Council (Rod Cherkas)** — contributor to the AI Playbook Vault.
- **Global Gainsight Admin (GGA) Slack** — active practitioner contributor.

Education and Certifications

- **Gainsight NXT Certifications (Level 2)**
- **Lean Six Sigma White Belt** — Henry Schein Center of Business Excellence, 2026
- **B.A., Psychology** — Transylvania University, Lexington, KY
