Professional Summary

Customer success operations practitioner specializing in digital-led and scaled CS programs, lifecycle automation, CSM-facing reporting, and the AI and knowledge systems a 50+ CSM organization runs on. Four years before that building lifecycle and engagement programs at Recorded Future, a threat intelligence company. Gainsight NXT Level 2 certified, two consecutive terms on the Gainsight CS Ops Product Council, two-time Platinum Gainstar. Psychology degree underneath all of it — audience segmentation and behavioral design are the foundation.

Core Skills

Digital and Scaled CS: Digital-led and scaled CX journeys, lifecycle campaign design and audience segmentation, tech-touch and pooled coverage models, B2H (“business-to-human”) communication design, message and cadence testing, CSM enablement, change management

AI Enablement: Gemini (custom Gems, Deep Research), Gemini Notebook (formerly NotebookLM), Claude (Projects, reusable Skills), Microsoft Copilot Premium (grounding, memory), Granola — prompt design, agent and skill architecture, design-time vs. runtime thinking

Gainsight: NXT Level 2 certified. Journey Orchestrator (Dynamic and Advanced JOs, audience filters), Data Designer, Health Scores, CTAs and Playbooks, Gainsight Copilot, Surveys, Reports and Dashboards

Knowledge and Governance: Knowledge systems (SharePoint, Microsoft Loop, Notion) — database and schema design, wikis, forms, dashboards, infographics, SOPs; documentation and naming conventions; software evaluation through legal and security review; project planning

Platforms and Tools: Gainsight, Salesforce, Domo, Notion, Google Workspace, Microsoft 365, Slack, Jira, Atlassian Rojo, Confluence, Smartsheet, Airtable, Adobe (Photoshop, Illustrator), HTML

Professional Experience

Staff Customer Success Communications and Content Manager

Henry Schein One · Remote · January 2026 – Present

- Own the CS intelligence and AI-enablement function for a 50+ CSM organization: Journey Orchestrator architecture, the AI workflows the team runs on, and the knowledge systems underneath both. Partner with Salesforce administration and BI on the upstream data layer.
- Built 7 of the 16 Journey Orchestrator programs running in production, mostly lifecycle, and own triage when one stops firing. Onboarding and adoption programs drive new-user office hours, converting at roughly 13% from email click to registration.
- Retired a business-review prep prompt I’d shipped to the Gainsight Copilot library — the output was inconsistent. Orchestrated the replacement with our BI and data teams: a self-service Domo dashboard where a CSM enters an account number and gets usage data beside talking points from a script I own. Prep dropped from an hour-plus to 15–30 minutes.
- Built the Journey Orchestrator program routing lower-priority accounts to automated self-service guidance instead of a CSM touchpoint — several hundred accounts resolving issues like outdated devices and incomplete setup forms on their own, or requesting help when they need it. Under 10% require a CSM, freeing capacity without adding headcount.
- Designed the weekly CS Ops reporting workflow, replacing a manual status email. Microsoft Copilot prompts normalize the team’s Jira and Loop entries into a fixed schema — wins, blockers, on-track status, program metrics, roadmap — then render an HTML infographic. Prep dropped from half a day to 15–20 minutes, and it feeds director-level reporting.
- Pitched Notion as the CS Ops knowledge system and lost. Reworked the plan around an internal SharePoint site — lists, Copilot agents, and the related assets the team already works in — built on licenses the org already holds. No net-new vendor, no additional security review, no per-seat AI spend.

Senior Email Operations Specialist

Recorded Future · Threat Intelligence / Cybersecurity · Remote · January 2022 – January 2026

- Promoted from Email Campaign Specialist to Senior Email Operations Specialist in November 2024.

- Migrated legacy batch-and-blast email into behavior-triggered Journey Orchestrator programs running on real-time data. New-user activation reached a 47% click-to-open rate against a ~20% industry baseline; regional segmentation hit 67% CTOR, roughly 3x the global average.
- Re-architected webinar link and registration flows, driving a 300% increase in registration rates.
- Built platform-agnostic asset architecture — modular reusable templates, S3 storage, decoupled data pipelines — so campaigns survived tooling changes.
- Ran structured A/B testing on message tone and send cadence — friendly versus formal copy, and 3-day versus 7-day send delays — retiring the underperformer after each test window. Results drove the move to the shorter delay and shaped the B2H approach I still build with.
- Created Gemini agentic workflows (“Gems”) for task orchestration, brand-aligned copywriting, and technical link extraction, before AI tooling was part of the team’s remit.
- Shepherded software through a cybersecurity company’s legal and security review. When a vendor’s documentation came up short, worked with their product team until their public FAQ carried the detail our security reviewers needed.

Email Marketing Specialist

Rugs.com (Unique USA Inc) · Charlotte, NC / Remote · 2021

- Produced 14+ campaigns weekly across audiences up to 1.9M, managing variants for a 1.1M+ subscriber list, and executed IP-warming through CRM migrations.

Change Communications Specialist (Business Initiatives Consultant II)

Wells Fargo · Charlotte, NC / Remote · 2019 – 2020

- Drove enterprise change communications across large-scale business initiatives.

Email Marketing Specialist

Quest Oracle Community · 2017 – 2019

- Built 20–30 technical and continuing-education email programs monthly for a 65K+ member community reaching C-level and end-user audiences.

Communications and IT / Media Manager

Silver Springs Stud / Margaux Farm · 2009 – 2017

- Led marketing, communications, and early digital and media operations for Kentucky Thoroughbred businesses.

Community and Thought Leadership

- **Gainsight CS Ops Product Council (2025 and 2026 terms)** — selected two consecutive years to advise Gainsight on product development alongside admins from enterprise SaaS organizations.
- **Two-time Platinum Gainstar** — second-highest point total community-wide in 2026, and one of six members at Platinum tier (US-based). Recognized on stage at Gainsight Pulse (2026, Las Vegas).
- **Gainsight Pulse Academy Live presenter (2025, Las Vegas)** — on combining Data Designer templates and broad audiences with Dynamic Journey Orchestrator audience filters for standardization and precision targeting at scale.
- **Gainsight Gamechanger Community** — VIP contributor; author of a published Journey Orchestrator best-practices article series.
- **AI in Post-Sale Council (Rod Cherkas)** — contributor to the AI Playbook Vault.
- **Global Gainsight Admin (GGA) Slack** — active practitioner contributor.

Education and Certifications

- **Gainsight NXT Certifications (Level 2)**
- **Lean Six Sigma White Belt** — Henry Schein Center of Business Excellence
- **B.A., Psychology** — Transylvania University, Lexington, KY
